IFS Certificate Pracht Luminaire Apollo N LED PMMAopal

12.12.2016

Greetings Ladies and Gentlemen,

Enclosed you will receive our updated and most current IFS certificate.

The Pracht Luminaire Apollo N LED, with PMMAopal high performance reflectors, fulfills the requirements of the IFS certification with its superior properties

The materials used in this LED are resistant to many cleaning agents, acids, alkalis, fats, oils and other chemical agents

- The reflector made of opal acrylic glass prevents light from coming out of the luminaire in the event of a lamp defect.
- The surface areas of the luminaire are easy to clean.
- Parts of the luminaire are bound so that the parts will not dismantle during maintenance

Furthermore, the Apollo N LED fixture with PMMAopal high-performance reflector has a very high lighting efficiency thanks to the use of high-quality LEDs and Pralux Mirror Technology.

If you have any further inquiries, we will be happy to address them.

Kind regards from Buchenau
