Space

New luminaire by AART Designers
Registered design

AART Designers and Focus Lighting have created Space, a sophisticated, large-scale luminaire with outstanding lighting properties. Circular shades and diffusers are designed to expand the light from a compact LED to powerful and comfortable illumination - creating new human spaces.

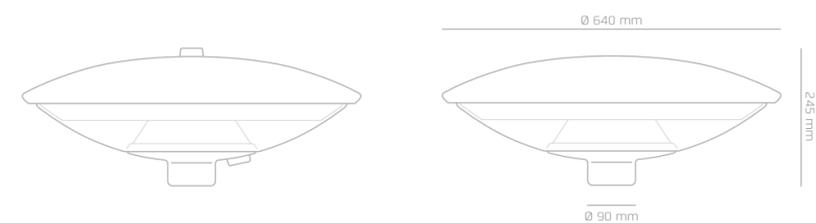

Benefits:

- + Comfortable direct/indirect lighting
- + Excellent light distribution with unique uniformity
- + Elegant on high and low columns
- + Easy smart city integration
- + Dark-sky friendly lighting

- + Option for asymmetrical lighting
- + Suitable for \varnothing 60 and 76 mm standard columns
- + Cylindrical columns \varnothing 90-180 mm
- + Highly corrosion resistant

Technical excellence:

- + Luminous power up to 4000 lm
- + 2700, 3000 or 4000 K, CRI 80, option for wider ranges
- + IK10, IP66
- + 3-6 meter columns
- + 4 standard colours + customised

When form and function interact and
when light and luminaires create new spaces
where people feel comfortable and safe
- then a small part of our ambition is fulfilled

Visit focus-lighting.dk for inspiration
and details on our luminaires.
