

Lighting Solutions

Verre

Where control, quality & design converge

Look

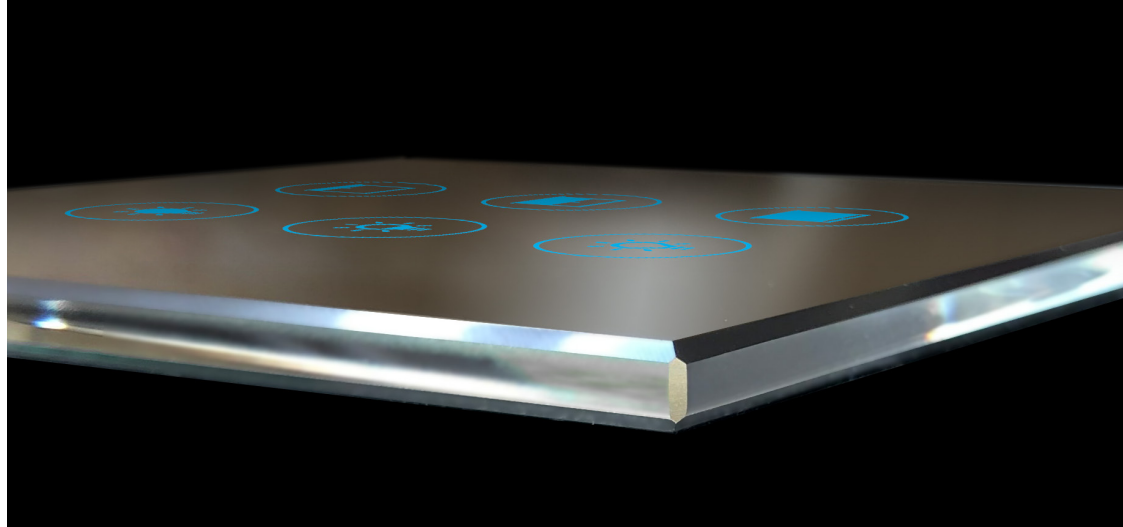

Contemporary design

Verre is made from exceptionally high quality glass with a polished bevelled edge. The pure uninterrupted surface exemplifies minimalist design.

With its high gloss finish, Verre compliments any interior design by reflecting its surroundings.

Personalise the design by selecting from a vast array of icons and choose any colour for the button illumination.

...see

Touch

Tactile user experience

Sensing your presence and elegantly illuminating prior to touch. Interaction is then effortless with the capacitive buttons reacting to the lightest of touch.

Dynamic button highlighting, illumination colour or even audible feedback heightens the sensory experience.

...feel

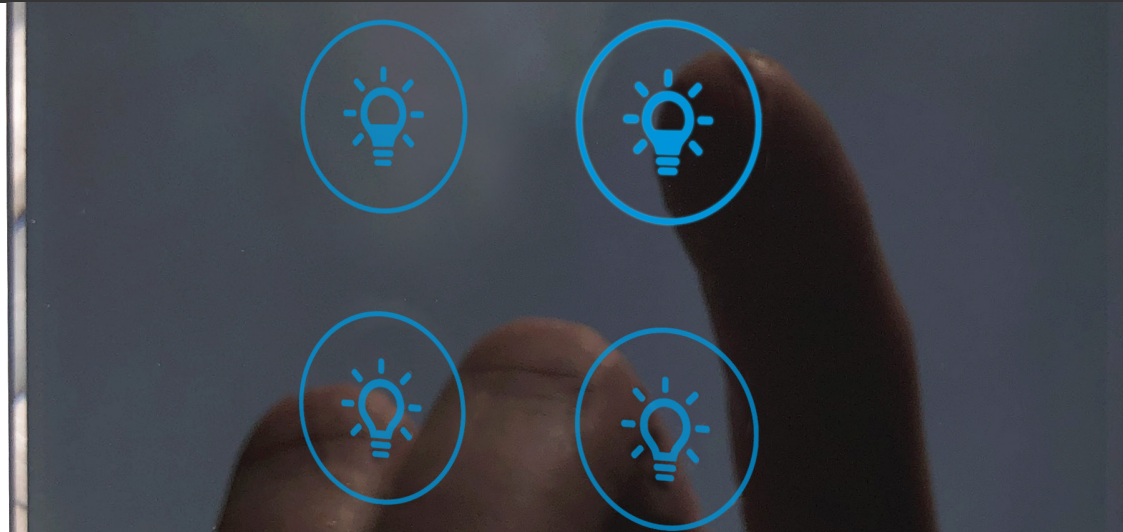

Act

Intuitive control

A single button can instigate a series of timed events, colour changes or dynamic effects, or simply select pre-set levels and scenes to make great lighting design repeatable time after time.

Seamless control of your lighting, shading, heating and cooling from a single series of user interfaces.

...react

Verre Series

Capacitive glass single gang user interfaces for the control of lighting, shading, heating and cooling. Available in a minimal look with circular buttons, pre-configured with function icons, or customised to meet client requirements

Verre - Minimal

A clean, uncluttered control plate featuring 6 circular buttons. Each of which configures to provide a multitude of functions from lighting, shading or heating to triggering advanced actions.

Lighting

Lighting control plate featuring two zones of lighting. Whether you want control of a bedroom and its en suite, a living space and the terrace, a conference room and its lobby or simply 2 zones of lighting within the same space.

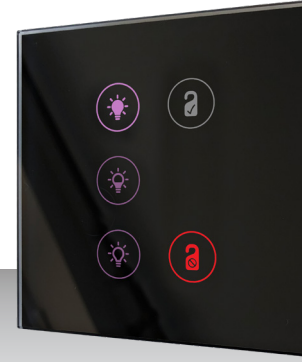

Lighting & Shading

Dual function lighting and shading control plates available in left and right handed configurations, ideal for bedside control applications

Climate

Heating and cooling control featuring temperature display, temperature raise and lower buttons, fan speed and power buttons.

Entrance

Ideally suited for hotel guest rooms, the entrance control plate provides a single zone of lighting as well as functions to set a room to 'Do not disturb' (DND) or 'Make up room' (MUR).

Door Bell

Verre series also includes a Door Bell plate incorporating a large active door bell icon and room status icons (MUR/DND) set via Verre Entrance Plate. The Door Bell Plate can also incorporate the room number

Design

Iconography

Verre Series can be tailored to your project's needs by selecting icons from our comprehensive library.

Customise with area icons, popular scene based icons, actions or numbers.

As a guest

When you arrive

Set the lighting mood and room status when you walk in and don't want to be disturbed.

During your stay

Set your comfort levels and shading depending on the time of day.

Adjust the lighting via intuitive preset scenes whether you want to read, work, relax or watch television.

Out for the day

When you leave simply change the room status and know the room will be cleaned ready for your return.

At home

Simplifying your home

Remove wall clutter with control from a single user interface.

While you rest

Adjust the button illumination around the time of day.

Entertaining guests

Impress your guests, select the perfect mood night or day.

At work

While you work

Control the lighting and comfort levels in your immediate space.

When you present

Adjust the lighting, shading and AV with a single touch.

Meet with your team

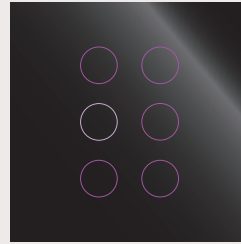

Set the scene for focus and collaboration.
